DIXON G. ARAYA ARIAS

Software Engineer | DevOps & Cloud Operations | Production Reliability

Costa Rica | +506 8520 0223 | dixon.ar08@gmail.com | linkedin.com/in/dixon-araya-devops/ | github.com/TavoA2

PROFESSIONAL SUMMARY

Computer Engineering graduate with approximately five years of combined experience in backend software development and enterprise application operations. Developed and supported Java/Spring Boot and C#/.NET services, REST APIs, and database integrations; later supported containerized production workloads on Kubernetes with Linux, CI/CD execution, monitoring, incident troubleshooting, and controlled changes for the Walmart account. Hands-on AWS and Terraform practice through independently built infrastructure labs. Comfortable collaborating across development, security, networking, and infrastructure teams to diagnose issues from application code to runtime behavior.

TECHNICAL SKILLS

Software Engineering: Java, Spring Boot, C#, .NET, REST APIs, microservices concepts, SQL, application debugging, Git

DevOps & Containers: Kubernetes, Docker, Podman, Helm, Jenkins, Git-based workflows, deployment validation, rollback procedures

Systems & Cloud: Linux (Red Hat), Windows Server, Nginx, IIS, AWS (hands-on lab), Azure-hosted application support

Infrastructure as Code: Terraform (personal AWS lab); familiarity with cloud infrastructure concepts

Observability & Operations: Grafana, Splunk, Prometheus, CloudWatch (lab), incident triage, logs, health checks, RCA support

Networking & Security: DNS, TCP/IP, HTTP/HTTPS, TLS/SSL, SSH, certificates, service accounts, credential rotation

Scripting & Databases: Bash, Python fundamentals; SQL Server, PostgreSQL, Oracle, MySQL, MongoDB; DB2 connectivity support

PROFESSIONAL EXPERIENCE

Babel — Walmart Account | Application Administrator / Platform Operations Support | 2023–2026

- Supported enterprise production applications and Kubernetes workloads across development, certification, and production environments, investigating pod failures, service health, configuration, and connectivity.
- Troubleshot Linux and Windows-hosted applications using logs, system diagnostics, Nginx/IIS configuration, REST endpoint checks, and cross-team escalation to restore availability.
- Executed and verified existing Jenkins-based deployment and self-check workflows; supported change controls, production validation, and rollback coordination.
- Used Grafana, Splunk, and Prometheus to investigate application health, errors, and service behavior during incidents and post-change checks.
- Coordinated TLS certificate renewals, secret and service-account rotations, and authentication/connectivity issues with security, database, and networking teams.
- Documented incidents and operational changes in ServiceNow, Jira, and Confluence; collaborated with engineers on diagnosis and remediation.

Global Apps Solutions | Backend Software Developer | 2021–2023

- Developed and maintained backend application features and REST integrations using Java/Spring Boot and C#/.NET.
- Worked with relational and NoSQL databases, including SQL Server, PostgreSQL, Oracle, MySQL, and MongoDB, to support application workflows.
- Investigated application defects, collaborated on fixes, and used Git and Agile practices to support delivery and maintainability.

SELECTED HANDS-ON PROJECTS

AWS DevOps Lab — Terraform, AWS, CloudWatch | github.com/TavoA2/AWS-DEVOPS-LAB

Built a learning environment with VPC networking, public/private subnets, route tables, security groups, EC2, IAM roles, and SSM. Used Terraform validation and deployment workflows; investigated IAM permission errors and tested CloudWatch alarm state transitions. *Personal lab, not production client infrastructure.*

Kubernetes Platform Lab — Docker, kind, Kubernetes | github.com/TavoA2/clubscope-platform

Practiced local container orchestration, manifests, service connectivity, and Kubernetes troubleshooting in a reproducible lab environment.

EDUCATION & TRAINING

Bachelor's Degree in Computer Engineering — Universidad Estatal a Distancia (UNED), Costa Rica

Additional training: Cisco CCNA Routing & Switching Modules 1–4; INA Technical Support; AWS/DevOps, Terraform, Docker/Kubernetes, Linux Administration, Jenkins/CI-CD; Cisco Python Essentials I & II. Coursework and training are not represented as professional cloud certifications.
